Search with “terms & connectors”

Just enter your words and connectors in the red search box, e.g., same sex! W/10 marriage, and select Search. Lexis Advance automatically interprets search commands such as ! and * to truncate words and W/n, OR, AND, etc. For help selecting connectors, select the Filters pull-down menu in the red search box and select Advance Search.

Please note: Lexis Advance ignores certain “noise words” in your query but counts these noise words when determining the proximity of terms in a document. So, broaden your proximity connectors. For example, consider searching W/10 instead of W/5. For W/p and W/s, consider W/75 or W/25, respectively.

Note: Only the AND connector works in Lexis® Web.

Combine sources/search favorite sources

To combine sources:
1. Enter a partial source name in the red search box. The word wheel will make suggestions. Select a source.
2. Repeat to add more sources to your search. The source combination is saved automatically in Recent & Favorites.

View recent searches and create Favorites:
• Select the Filters pull-down menu in the red search box and select Recent & Favorites.
• View recently searched sources, combinations, legal topics and pre-search filters.
• To create a Favorite: Select the star next to the title. Once a Favorite, the item remains in your Recent & Favorites list and Favorites pod.

Favorites—can include sources, source combinations, legal topics and prefilters. The Favorites pod displays on the Lexis Advance home page for quick access.

All out-of-subscription documents are marked. Plus you can see the cost and your search words in context to help you make a purchase decision. Documents available at a special price include a Save! icon. (Not shown.)

You can only access the document via the Get it now! link. (The document title is not linked.) You can also save the document to a Folder and purchase it later. There is no charge to hold an out-of-plan document in a Folder. Click the checkbox then the Folder icon and make your Folder selection.

Linking to out-of-plan documents

If you click an embedded link, i.e., attempt to link from a full-text subscription document to an out-of-plan document, you are notified and can cancel the task, or save or purchase the document:

Reminders on documents you purchase

Once purchased, non-subscription documents can be used for 90 days—or for one year if the document is saved to a Folder. Lexis Advance shows you the expiration date on the:

- full-text document in the “About this document” box
- search results listings showing that document
- History lists displaying that document
- Folder listings for that document. Updates to that Folder document during the year you use the document are included in the purchase price.

Using search commands and connectors at Lexis Advance®

Lexis Advance® lets you use advanced search commands.

If you’re comfortable using search commands and connectors—! and * to truncate words and W/n, OR, AND, etc., to connect search words and phrases—you can use these special commands to develop Lexis Advance searches. Here’s what you need to know:

**Lexis Advance® automatically interprets search commands**
Just enter your words and commands in the Lexis Advance red search box, e.g., ENTER: drone and commercial W/10 deliver!. Commands are not case-sensitive, i.e., enter AND, And or and.

**Broaden W/n connectors**
While a Lexis Advance search ignores certain “noise words” added to your search, it counts all words in results documents for the purpose of determining proximity. So broaden your W/n connector. In other words, consider W/10 instead of W/5. For W/p and W/s, consider W/50 or W/15 respectively.

**Search Lexis® Web separately**
Only the AND connector works. The other commands do not operate in Web documents.

**Let the red search box help you!**
Click the filters pull-down menu in the red search box and select Advance Search. Choose search connectors and decide whether to include or exclude search words. Make your selections and add them to your search.

**When more than one connector is used ...**
Lexis Advance acts on the connectors in this order:
- OR
- Proximity connectors (W/n, /p, near/n, etc.): from left to right
- AND
- AND NOT, NOT W/n

For example, you ENTER: bankrupt! /25 discharg! AND student OR college OR education! /5 loan.

First, Lexis Advance creates a unit of student OR college OR education!. Next bankrupt! /25 discharg! is joined, and Lexis Advance ties loan to the unit of student OR college OR education!. Finally AND operates last, joining the created two units. Thus: (bankrupt! /25 discharg!) AND ((student OR college OR education!) /5 loan).

**Common legal phrases**
The Lexis Advance service automatically recognizes many common legal phrases, e.g., limited liability partnership, summary judgment, and search and seizure. However, if you want to be sure any phrase you’re searching is recognized, enclose it in quotation marks, i.e., ENTER: “right to work.”
Here’s an overview of Lexis Advance commands and connectors and how they work:

<table>
<thead>
<tr>
<th>Command/Connector</th>
<th>Overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>! \textit{Child!} finds \textit{child}, \textit{children}, \textit{childless}, \textit{childish}, etc.</td>
<td>Used after word endings only. The word requires a minimum of three characters for the wildcard to be applied. Find the word root plus an unlimited number of additional characters. Note: Lexis Advance automatically finds common plural words, i.e., ending in s, es and ies.</td>
</tr>
<tr>
<td>* \textit{When used as a suffix: Bank* is the same as Bank! The ! and * are equivalents. They will both replace 0 or more characters.}</td>
<td>Search results for \textit{d<em>g} include \textit{dog}, \textit{Demming} and \textit{digging}. \textit{Do</em>g} will find \textit{dog}, \textit{doing} and \textit{doug}.</td>
</tr>
<tr>
<td>OR \textit{physician OR doctor}</td>
<td>Lexis Advance finds documents with either word or both words.</td>
</tr>
<tr>
<td>AND \textit{bank** AND deregulat!}</td>
<td>Lexis Advance finds documents with BOTH words only. Words can be ANYWHERE in the same document, not necessarily close in context.</td>
</tr>
<tr>
<td>\textit{W/n or near/n} \textit{disparate W/10 impact or disparate near/10 impact} (Use a number with W/n or near/n)</td>
<td>\textit{W/p or /p} Converts to W/50 \textit{W/s or /s} Converts to W/15 \textit{W/seg or /seg} Converts to W/100</td>
</tr>
<tr>
<td>AND NOT \textit{rico AND NOT puerto}</td>
<td>Lexis Advance finds documents with “rico.” Documents with any mention of “puerto”—anywhere in the document—will not be retrieved.</td>
</tr>
<tr>
<td>NOT W/n You must use a number with NOT W/n.</td>
<td>NOT /n \textit{rico NOT W/2 puerto} will find documents where “puerto” is mentioned, but not within two words of “rico.” The NOT W/n connector is less restrictive than AND NOT; unless you’re certain specific words must be totally excluded from your results, use NOT W/n instead of AND NOT.</td>
</tr>
<tr>
<td>\textbf{ATLEASTn} \textit{You must use a number and search words in parentheses with ATLEASTn. ENTER: atleast5(obama AND putin AND oil)} and a Lexis Advance search will find documents with at least five mentions of each search word. You can use the OR and AND connectors with ATLEASTn. You can use the OR, AND and proximity connectors like W/n with ATLEASTn.</td>
<td></td>
</tr>
