21

2024:

BEING ON GUARD FOR STRESS AND ANXIETY-RELATED HEALTH ISSUES

**SELF-CARE NOW MORE
IMPORTANT THAN EVER!**

22

Symptoms to Watch For:

- Trouble focusing on daily activities
- Anxiety that turns into feelings of being out of control
- Strong feelings that interfere with daily activities
- Having emotions that become difficult to manage
- Feelings of hopelessness or helplessness
- Increase in alcohol or drug use

23

What is Stress? Is it the same as Anxiety?

Stress

Typically caused by an external trigger:
Work deadlines, fight with a loved one, chronic illness, etc.

Anxiety

Persistent, excessive worries that don't go away even in the absence of stress

24

25

HOW STRESS AFFECTS THE BODY

26

Is Stress bad?

27

Maximizing “Eustress”

- Focus on the resources you need to meet the challenge
- Seeing the potential benefits of a situation
- Reminding yourself of your strengths
- Having a positive mindset (aka optimism)

28

Can “Bad” Stress be Reframed?

29

It's Tougher for Lawyers

Two primary traits of a Lawyer:

1. Perfectionism
2. Pessimism

Negative outlook = high risk for stress and anxiety

How lawyers can avoid burnout and debilitating anxiety
BY LESLIE A. GORDON 2015
ABA JOURNAL

30

The Impact of Stress

- Obsessive thoughts
- Feelings of inadequacy
- Difficulty concentrating
- A sense of worry and/or impending danger
- Sleep disturbances
- Heart palpitations
- Sweating, fatigue and muscle tension

31

*It can be hard to see
changes in ourselves*

32

A Lawyer's Mental, Emotional, and Physical State Directly Impacts:

- Their Client
- The Court
- The Profession

33

Tennessee Rules of Professional Conduct Rule 1.1 Competence

Rule 1.1 Competence

A lawyer shall provide competent representation to a client. Competent representation requires the legal knowledge, skill, thoroughness and preparation reasonably necessary for the representation.

34

Are You Overwhelmed?

Stress and burnout impact the quality of our representation

35

Coping Strategies

Maladaptive coping behaviors by lawyers seeking some control:

- Self-medicating with **alcohol** and other substances.
- Food disorders
- Gym Anorexia
- Unhealthy Sexual Behaviors
- Compulsive Video Gaming
- Hair Pulling
- Isolation and withdrawal from friends and family
- "Stuffing" feelings and ignoring mental health concerns

Lawyers "intellectually know" the foundations of a healthy lifestyle:

- Healthy Diet
- Daily Meditation to find an "Off Switch"
- Aerobic Exercise at least 3 times per week
- 8 Hours of Sleep

36

Barriers to Healthy Habits

- Employer's demands for billable hours
- Clients' demands on top of employer's demands
- Lack of control over calendar and scheduling
- Misconception that excessive self-sacrifice is required (began in law school)
- Allowing demands of practicing law to dictate time left for friends and family
- The demands of law can't be controlled, only perfectionism in law can be
- Wanting to appear tough and invincible

37

Lawyer Mental Health

Lawyers over the course of their legal career:

Anxiety 61.1%
 Depression 45.7%
 ADHD 12.5%
 Panic Disorder 8.0%
 Bipolar Disorder 2.4%
 11.5% reported suicidal thoughts during their career

2016 ABA Hazelden Study:
*The Prevalence Substance Use
 and Other Mental Health Issues*

38

Alcohol and Depression

2016 ABA Hazelden Study:
*The Prevalence Substance Use
 and Other Mental Health Issues*

39

Alcohol Use Findings- AUDIT

20.6% scored at a level consistent with hazardous drinking and possible alcohol **dependence** (moderate to severe alcohol use disorder)

Men (25.1%) vs. Women (15.5%)

Professionals aged 30 or younger had the highest rates (31.9%)

Higher rates were also found for those at the junior (31.1%) or senior associate (26.1%) level compared with other firm positions

40

COVID and Alcohol Use

**Alcohol related deaths in U.S:
25% increase since COVID**

*Journal of American Medicine;
March 2022.*

41

Top Barriers to Help:

- Fear of losing law license
- Social stigma
- Privacy concerns
- Financial reasons or loss of income while in treatment
- Belief that they could handle problems on their own
- Not having enough time

42

Be Proactive to Reduce Odds

Lawyers can reduce the probability of developing problems:

- Recognize that self-care is not just a good idea; it's critical
- Adopt a new outlook on what competency is, and include self-care
- Change legal profession's "corporate culture" on mental health
- Believe that no one is immune (yes, *even you* . . .)
- Understand that impairment affects everyone in the profession
- Stamp out Mental Health STIGMA and accept disease model

43

Don't ADD to Stress... Protect Yourself from Being "Slimed"

44

Is Self-Care becoming a *Professional Duty?*

45

California Rule 3-110 (B)

Self-Care as a *Professional Duty*:

Rule 3-110 Section (B) Competence

For purposes of this rule, "competence" in any legal service shall mean to apply the 1) diligence, 2) learning and skill, and **3) mental, emotional, and physical ability** reasonably necessary for the performance of such service.

46

BALANCE and WELL-BEING ...

ARE ABSOLUTELY ACHIEVABLE!

47

Start With Self-Assessment

48

Resilience Strategies

- Meaningful Work (aligns with your values)
- Autonomy where possible (number one factor in lawyer happiness*)
- Flexible Optimism (avoid catastrophizing and pessimism)
- Meditation (an actual “off switch” that is uniquely beneficial)
- Mindfulness (don’t miss out on the beauty of the present moment)

Mind Full, or Mindful?

50

Specifically for Lawyers

51

What Can a Lawyer Control?

As a Lawyer Can You Control:

The law?

The facts?

What witnesses say?

What the opposing counsel does?

What the opposing client does?

What your client does?

What the judge or jury does?

52

Litigation: *No Problem!*

53

Realistic Expectations

Expecting to Win, or Even Achieve "Justice" in Every Case:

- An unrealistic yardstick
- Creates negative self-image
- Creates unnecessary Stress and Anxiety
- Can lead to Depression and other problems
- Client control and setting realistic expectations up-front can help

54

Anxiety and Fear vs The Present Moment

55

Focusing on “The NOW”

Eckhart Tolle: *Can You Ever Stop Thinking, even For a Moment?*

“Can you be free of your mind whenever you want to? Have you found the “off” button or are you a “slave” to thinking?”

“Your mind is an instrument, a tool. When a specific task is complete, you lay [the tool] down.”

“I would say that 80 to 90 percent of most people’s thinking is repetitive and useless.”

“If you feel you cannot stop thinking compulsively, it has become an addiction.”

From the Book:
The Power or Now, A Guide to Spiritual Enlightenment, Eckhart Tolle
New World Library,
1999 and 2004

56

Everything Happens in the NOW

BEING and Reality in the NOW:

Everything that happens does so NOW, and only in the present moment

We never experience, do, think, or feel anything outside the NOW

Nothing happened in the past, it happened in a former NOW

Nothing happens in the future, it will only happen in a future NOW

The past is a memory of a former NOW; the future is an imagined NOW

Past and future have no reality of their own, there is only the NOW

From the Book:
The Power or Now, A Guide to Spiritual Enlightenment, Eckhart Tolle
New World Library, 1999 and 2004

57

Everything Happens in the NOW

Fear and Worry:

You are identifying with your mind and thoughts instead of the NOW

Fear and worry come from imagined future situations

A future situation can't be coped with, it doesn't exist; it's a *Phantom*

Answer: shift focus to the present moment

All you ever have to deal with in life is this moment, the NOW

Ask yourself what problem you have right NOW, not next year, tomorrow, or five minutes from NOW

From the Book:
The Power or Now, A Guide to Spiritual Enlightenment, Eckhart Tolle
 New World Library, 1999 and 2004

58

Everything Happens in the NOW

All coping happens in the NOW:

You can always cope with the NOW; you always have your whole life

The answer, the strength, the right action or the resource will be there when you need it, not before nor after

This does NOT mean you should not prepare for the future *as need be*, but it means that compulsive thinking, worry and anxiety about a future event serves no purpose

From the Book:
The Power or Now, A Guide to Spiritual Enlightenment, Eckhart Tolle
 New World Library, 1999 and 2004

63

Stress Management For Lawyers

Eliminate Lawyers' Habits of Negative Thinking

- Learn to recognize your negative thinking habits
- Negative perceptions of specific individuals or events
- Negative statements about general beliefs, rules, and assumptions
- All categories, past, present and future
- Test thoughts and require evidence that they are not distorted
- In fact, is there any evidence at all to support your thoughts

From the Book:
Stress Management for Lawyers,
How to Increase Personal & Professional Satisfaction in the Law,
 Amiram Elwork, Ph.D. Vorkell Group 2007

64

Stress Management For Lawyers

Example of testing a negative thought:

- "I am going to totally blow this trial"
- How do you KNOW this will happen before the trial even starts?
- How many times have you actually blown a trial before?
- How many times have you said that but it never happened?
- What is a possible truth: I need to prepare a little more . . .

Being overwhelmed by negative thought allows insecurities to **catastrophize** and **exaggerate** things and you pay an emotional price

Stress Management for Lawyers,
How to Increase Personal & Professional Satisfaction in the Law,
 Amiram Elwork, Ph.D. Vorkell Group 2007

65

Stress Management For Lawyers

Once a REAL problem has been validated, ask:

- How can I fix this?
- What can I do about it right now?
- What can I do to improve matters?
- How can I solve this problem in the future?

This type of approach gets you out of a **negative catastrophe mode** and into a **positive solution mode**.

66

The Ingredients of a Lawyer

Successful lawyers have invested in their law license and practice:

- Tremendous time
- Relentless effort
- Momentous financial investment
- Considerable emotional, mental, and family sacrifices
- All-in Sunk Costs: law school and then practice development

Resulting in:

- A hard-won singular self-image of who they are (a lawyer)
- Self-expectations of self-reliance and unshakable resilience

67

But What About Self-Care?

The Missing Ingredients:

- Legal skills and knowledge do not produce mental health self-care
- Most lawyers have received little or no professional therapy or training in mental health self-care that is needed to thrive under stress
- Many lawyers have difficulty with life/work balance and boundaries
- It takes **learned, intentional, and specific health habits** to protect one's daily mental and physical health while practicing law
- The legal profession is awakening to the concept of a Duty of Professional Self-Care (CA Rules' new definition of competence")

68

Suggested Self-Care Code

Make these pledges on your own:

Universal right to wellness : Every lawyer and judge has a right to wellness associated with self-care.

Physical rest and nourishment: Every lawyer and judge deserves restful sleep and physical separation from their practice that sustains them in their practice.

Emotional Rest and nourishment : Every lawyer and judge deserves emotional and spiritual renewal both in and outside the practice context.

Sustenance Modulation Every lawyer and judge must utilize self-restraint with regard to what and how much they consume (e.g., food, drink, drugs, stimulation) since it can compromise their professional competence.
